David Olayemi

Client Support Specialist · Trading Operations · Technical Support

Lagos, Nigeria | olabolade999@gmail.com | +234 902 299 6320 | github.com/LegenDavid-Abo | linkedin.com/in/david-olayemi

Professional Summary

Results-driven support specialist with hands-on experience in fast-paced trading and financial services environments. Proven track record delivering sub-60-second client response times in high-volume Discord support channels for a prop trading firm. Built and operate a live automated trading bot with custom strategy execution and risk management, deployed on AWS EC2 and running perfectly. Combined with deep technical knowledge of authentication, compliance workflows, and platform troubleshooting, I bring a rare mix of client-facing communication skills and trading systems expertise ideal for supporting traders in a brokerage environment.

Core Competencies

CLIENT SUPPORT

- High-volume live chat & ticket resolution
- SLA-driven response under 60 seconds
- Clear, accurate technical writing
- Escalation & incident management
- Pattern spotting & feedback loops

TRADING & RISK

- Automated strategy execution
- Risk management & position sizing
- Live trade tracking & monitoring
- Prop firm & brokerage environments
- Account verification & access control

PLATFORM & TOOLS

- Intercom help desk & ticket workflows
- Discord moderation & support bots
- Zendesk & help desk workflows
- AWS cloud infrastructure
- API integrations & troubleshooting

TECHNICAL SKILLS

- Python, JavaScript, TypeScript, SQL
- REST & GraphQL API design
- PostgreSQL, MySQL, MongoDB, Redis
- React.js, Node.js, Flask
- Knows AWS (EC2, Lambda, S3, CloudWatch)

Professional Experience

Trading Bot Developer & Strategy Operator | **Independent** — Mar 2024 – Present

Built and currently operate a fully automated trading system with custom strategy execution, risk management, and live trade monitoring across multiple accounts. The bot is live, fully functional, and running perfectly on AWS EC2.

- **Strategy Automation:** Built a fully automated trading bot that executes trades automatically when predefined strategy conditions are met, operating across multiple trading accounts simultaneously without manual intervention.
- **Risk Management:** Implemented built-in risk controls including position sizing, stop-loss logic, take-profit rules, and daily loss limits to protect trading capital across all connected accounts.
- **Live Trade Tracking:** Developed real-time trade monitoring and logging to track performance, win rates, drawdowns, and P&L across multiple accounts simultaneously through a live dashboard.
- **Cloud Deployment:** Deployed and hosted the trading bot on AWS EC2 with a public dashboard for live monitoring, remote control, and strategy management.
- **Live Dashboard:** http://16.170.35.248:8000/

Senior Full Stack Engineer | NovaEdge Technologies Remote | Feb 2024 – Feb 2026

B2B SaaS workflow automation platform serving 15,000+ MAU. Responsibilities included client-facing technical support, platform reliability, and cross-functional coordination.

- **Client Support & Communication:** Served as technical point of contact for enterprise clients, resolving account setup issues, explaining platform features, and documenting solutions for the knowledge base.
- **Incident & Escalation Management:** Maintained 99.9% platform uptime through proactive CloudWatch monitoring and rapid incident response; reduced deployment failures by 80% via automated CI/CD pipelines.
- **Workflow Automation:** Built an NLP-powered automation engine (Python + spaCy) that eliminated 45% of manual data-entry workflows, saving $120,000 annually; experience directly applicable to support automation and macro design.
- **Cross-Functional Coordination:** Led a 4-person remote squad through agile sprints, collaborating with product and operations to ship 12+ major features and resolve client-reported issues.
- **Cost & Performance Optimization:** Cut server costs by 35% ($4,200/month) through query optimization and AWS Lambda migration; designed APIs handling 2M+ requests/month with <200ms p95 latency.

Client Support Specialist / Discord Moderator | FundingPips Remote | Mar 2023 – Dec 2023

Front-line client support in a prop trading firm Discord community with a strict SLA system requiring rapid response to trader enquiries.

- **SLA Compliance:** Operated within a strict SLA framework requiring all moderator responses to client enquiries in under 60 seconds, consistently meeting and exceeding response-time targets.
- **High-Volume Support:** Managed a high volume of real-time trader questions during market hours, including account issues, payout enquiries, platform navigation, and rule clarifications.
- **Fast & Accurate Resolution:** Recognized by the team for being exceptionally fast and effective at resolving client issues, de-escalating frustrated traders, and providing clear answers the first time.
- **Community Management:** Monitored Discord channels for policy violations, spam, and off-topic discussions while maintaining a professional, helpful tone that preserved client trust.
- **Feedback Loop:** Identified recurring client pain points and reported patterns to senior moderators and operations, contributing to FAQ updates and process improvements.

Software Engineer | CloudSync Digital Solutions Remote | Feb 2023 – Dec 2023

Enterprise cloud infrastructure and integrations for 10,000+ users. Focus on authentication, security, and client-facing integrations.

- **Account Security & Verification:** Engineered RBAC authentication with MFA and SSO (Auth0, Azure AD) for 10,000+ enterprise users; deep familiarity with secure account access and identity verification flows.
- **Platform Performance:** Optimized MySQL queries and implemented Redis caching, reducing page load times by 74% (4.2s to 1.1s); translated technical improvements into clear client communications.
- **Revenue-Generating Integrations:** Delivered 15+ third-party API integrations (Stripe, SendGrid, Twilio), generating $85,000 in new revenue; experience troubleshooting payment and notification issues end-to-end.
- **Global Collaboration:** Worked across 3 international time zones with design and product stakeholders, ensuring smooth client onboarding and feature rollouts.

Key Projects

Automated Trading Bot with Live Dashboard

Python · AWS EC2 · Risk Management · Live Trade Execution

- Built a fully automated trading bot that executes trades automatically when predefined strategy conditions are met, operating across multiple trading accounts simultaneously.
- Implemented comprehensive risk management including position sizing, stop-loss rules, take-profit logic, and daily drawdown limits to protect capital.
- Developed a live trade tracking system that monitors open positions, P&L, win rate, and strategy performance in real time.
- Deployed on AWS EC2 with a public-facing dashboard for remote monitoring and control of trading activity. The bot is live and running perfectly.
- Live dashboard: http://16.170.35.248:8000/

AI Customer Support Assistant

Python · Flask · spaCy · AWS EC2 · Zendesk · WhatsApp API

- Trained an NLP intent-classification model achieving **89% accuracy** on customer query resolution, directly reducing support ticket volume by **35%** for a pilot client within 60 days.
- Built webhook integrations with **Zendesk** and **WhatsApp Business API** for seamless human-agent handoff, mirroring Intercom-style ticket workflows.
- Deployed on AWS EC2 with auto-scaling; experience managing high-volume support events and maintaining platform stability during traffic spikes.
- Live demo: https://olayemi-portfolio-ai.onrender.com

Education

B.Sc. Computer Science

University of Lokoja, Nigeria · 2021 – 2024

First Class Honours · GPA: 4.65/5.0

Capstone: AI-powered plagiarism detection (Best Final Year Project, Dept. of Computer Science)

Certifications

Full Stack Web Development
freeCodeCamp · 2022

Backend API Development
Codecademy · 2022

Achievements & Recognition

- Reduced client operational costs by **$120,000/year** through AI-powered automation at NovaEdge Technologies.
- Zero production outages across 18+ months of AWS infrastructure management; maintained **99.95% uptime SLA**.
- Recognized at FundingPips for consistently delivering sub-60-second response times in high-volume Discord support.
- Published technical article "Scaling Node.js Microservices with Docker & AWS" — 5,000+ views on Dev.to.
- 50+ public repositories with 200+ commits on GitHub; consistent open-source contributions (2022–2024).
