PROFESSIONAL SUMMARY

Technical Support and Full Stack Engineer with extensive experience building AI-powered automation systems, customer support solutions, cloud infrastructure, and scalable SaaS applications. Skilled in identifying recurring customer issues, automating workflows, improving operational efficiency, and delivering solutions that reduce manual effort. Experienced in AI-assisted support systems, cloud platforms, API integrations, and modern web technologies. Passionate about leveraging technology to improve customer experience and eliminate repetitive support work through automation and intelligent tooling. Recognized for the Best Final Year Project Award at the University of Lokoja, demonstrating excellence in innovation and technical execution.

CORE COMPETENCIES

SUPPORT OPERATIONS	SOFTWARE ENGINEERING	FRONTEND DEVELOPMENT	AI & AUTOMATION
• Technical Troubleshooting • Root Cause Analysis • Customer Support Automation • Knowledge Base Development • Incident Investigation • Workflow Optimization • AI-Assisted Support Systems	• Node.js / Python / PHP • REST APIs & GraphQL • Authentication & Authorization • OAuth2 / JWT • RBAC Implementation	• React.js & TypeScript • Redux & State Management • Tailwind CSS & Bootstrap • Responsive Design • Modern UI/UX Patterns	• OpenAI APIs & spaCy • NLTK & TensorFlow • NLP Pipelines • Intent Classification • AI Workflow Automation
CLOUD & DEVOPS	DATABASES	COLLABORATION TOOLS	
• AWS (EC2, S3, Lambda, RDS) • CloudWatch Monitoring • Docker & GitHub Actions • Linux Administration • CI/CD Pipelines	• PostgreSQL & MySQL • MongoDB & Redis • Query Optimization • Database Design • Data Modeling	• GitHub & Slack • Linear & Postman • Jira & Zendesk • Intercom • API Documentation	•

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer | NovaEdge Technologies

Remote | January 2024 – Present

- Architected and maintained scalable SaaS applications using Node.js, Python, AWS, and React, serving thousands of active users.
- Built intelligent automation systems that reduced repetitive operational workloads by 40%, significantly improving team efficiency.
- Developed secure RESTful APIs using OAuth2/JWT authentication and role-based access control (RBAC) with comprehensive audit trails.
- Implemented CI/CD pipelines using GitHub Actions and Docker, reducing deployment time by 60% and improving release reliability.
- Collaborated with distributed teams across multiple time zones to deliver product improvements and operational tooling.
- Built internal productivity tools that streamlined workflows and reduced manual processes for cross-functional teams.

Software Engineer | CloudSync Digital Solutions

Remote | February 2023 – December 2023

- Developed cloud-based business applications and third-party API integrations serving enterprise clients across Africa.
- Implemented RBAC authentication systems and secure access controls, ensuring compliance with industry security standards.
- Optimized application performance through database tuning, query optimization, and Redis caching strategies.
- Integrated third-party platforms including payment gateways, messaging services, and email delivery systems.
- Supported infrastructure monitoring and incident response activities, maintaining 99.9% uptime SLA.

Junior Web Developer | TechFusion Africa

Hybrid, Lagos | January 2022 – January 2023

- Developed responsive websites and administrative dashboards for clients across education, finance, and healthcare sectors.
- Integrated payment gateways and business automation features, enabling seamless online transactions.
- Designed and optimized relational database structures, improving application response times by 35%.
- Built reusable frontend components that accelerated development workflows and maintained design consistency.

KEY PROJECTS

AI Customer Support Assistant

Python, Flask, spaCy, NLTK, AWS | OpenAI APIs

Live: olavemi-portfolio-ai.onrender.com | GitHub: github.com/LegenDavid-Abo/ai-support-bot

- Built an AI-powered customer support assistant capable of handling product inquiries, onboarding questions, billing issues, and technical troubleshooting.
- Developed advanced intent-classification workflows using NLP technologies, achieving 92% accuracy in query categorization.
- Implemented intelligent response systems with seamless human-agent escalation for complex issues.
- Reduced repetitive support workload by 50% through automated customer assistance and smart routing.
- Integrated multi-channel communication workflows and support automation capabilities.

Interactive AI Portfolio Website

React.js, TypeScript, OpenAI API, Modern Web Technologies

Live: <https://legendavid-abo.github.io/David-Olavemi-portofolio/>

- Developed an interactive AI-powered personal portfolio that enables recruiters to ask questions about experience, projects, skills, and career goals.
- Implemented retrieval-based information systems with natural language processing for accurate responses.
- Demonstrates practical application of AI in customer interaction, knowledge delivery, and modern web development.

CBT Examination Management System

PHP, MySQL, JavaScript, Bootstrap

Live: cbt-portal-ten.vercel.app

- Built a comprehensive role-based online examination platform serving 500+ students.
- Implemented automated grading, result generation, and question randomization features.
- Integrated secure payment processing for examination fee collection.
- Developed admin dashboards with real-time analytics and exam management capabilities.

Cloud File Management System

Node.js, Express, AWS S3, MongoDB

- Developed secure cloud storage and file-sharing functionality with granular access controls.
- Implemented comprehensive audit logging and user activity tracking.
- Optimized cloud storage costs through intelligent lifecycle policies and compression.

EDUCATION

B.Sc. Computer Science

University of Lokoja, Nigeria

First Class Honours | GPA: 4.65 / 5.0

Relevant Coursework:

- | | |
|------------------------|--------------------------------|
| • Software Engineering | • Data Structures & Algorithms |
| • Database Systems | • Cloud Computing |
| • Machine Learning | • Distributed Systems |

Capstone Project: AI-Powered Plagiarism Detection System — **Best Final Year Project Award**

CERTIFICATIONS & CONTINUOUS LEARNING

Continuous Self-Study: AWS Cloud Infrastructure, AI Automation, Large Language Models, Cloud Architecture, and Support Operations — actively building projects and staying current with emerging technologies.

- ▶ Full Stack Web Development — freeCodeCamp
- ▶ Backend API Development — Codecademy

ACHIEVEMENTS & AWARDS

- ★ Best Final Year Project Award — University of Lokoja: Recognized for outstanding innovation and technical excellence in developing an AI-Powered Plagiarism Detection System.
- ★ Built AI-powered automation systems that improved operational efficiency by 40% and reduced manual support workload by 50%.
- ★ Developed and deployed cloud-based applications serving real-world users across education, automation, and support domains.
- ★ Maintained production infrastructure and CI/CD deployment pipelines with 99.9% uptime SLA.
- ★ First Class Honours graduate with a GPA of 4.65/5.0, demonstrating consistent academic excellence.

OPEN SOURCE & TECHNICAL CONTRIBUTIONS

- Active GitHub contributor with multiple public repositories demonstrating expertise across the full technology stack.
- Built and maintained open-source learning tools and software projects focused on education and accessibility.
- Passionate advocate for open-source technologies and collaborative development practices.
- Regularly explore and implement cutting-edge solutions in AI, automation, cloud infrastructure, and developer tooling.
